DATA SERVICE & INFORMATION GMBH
GESELLSCHAFT FÜR WIRTSCHAFTSANALYSE UND PROGNOSE

OECD Selection 2011/12

former OECD Statistical Compendium

Key benefits

source:

- OECD Paris

services:

- combined product (DVD+internet)
- internet only

(all internet services could be offered for user id/ passcode or ip controlled login)

features:

- unique source of harmonized data
- data history up to latest figures
- monthly updates (internet only)
- powerful retrieval engines
 - by keyword search
 - by hierarchical breakdown
 - search by tree view
- embedded statistical tools
 - calculations
 - statistical operations
 - forecasts
 - regressions (DVD only)
- reports
- graphing applications
- data download

licences:

- single dedicated end user
- institute licence
- campus licence

highly recommended for:

- empirical, economic and social studies

DSI Statistical Compendium OECD Selection

The former OECD Statistical Compendium - now part of the new "DSI Statistical Compendium Series" - covers the full scope of DSI's high quality statistics from international sources.

Monitoring, analysing and forecasting

For more than 40 years, OECD (Organization for Economic Co-operation and Development) has been one of the world's largest and most reliable sources of comparable statistics and economic and social data. As well as collecting data, OECD monitors trends, analyses and forecasts economic developments and researches social changes or evolving patterns in trade, environment, agriculture, technology, taxation and more.

A statistical premium publication

DSI's Statistical Compendium - OECD Selection monitors the economic situation of the OECD in total and it's member economies:

Australia, Austria, Belgium, Canada, Chile, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States.

Value add

As a special value add the internet services include access to DSI's data archive: a collection of OECD databases ceased during the past decade, but archiving important economic questions of that period.

DSI Statistical Compendium OECD Selection

The essential statistical reference work regarding the economies of the Organization for Economic Co-Operation and Development (OECD)

Content by OECD title:

Total no. of latest time series: 1 Mio.

- General Economic Problems
 - Economic Outlook: statistics and projections
- Main Economic Indicators
- National Accounts
 - National Accounts at a Glance
 - Annual National Accounts I-IV
 - Central Government Debt
 - Quarterly National Accounts
- Labour Market and Social Issues
 - Annual Labour Force Statistics
 - Labour Market Database - OECD Members
- Health Statistics
 - OECD Health Data
- Financial and Fiscal Affairs
 - Revenue Statistics
 - Taxing Wages
 - Taxes and Benefits
 - International Direct Investment Statistics
 - Banking Statistics
- Industry, Science and Technology
 - Science, Technology and R&D Statistics
 - OECD Research and Development Statistics
 - Main Science & Technology Statistics
- OECD Structural Analysis Statistics
 - STAN Database
 - STAN Indicators Database
 - STAN Bilateral Trade Database
 - ANBERD Database
- International Trade Statistics
 - Monthly Statistics of International Trade

OECD Data Archive - selected overview:

OECD Historical Statistics, Business Sector Database, International Sectoral Database, Annual & Quarterly Labour Market Statistics, International Migration Statistics, Institutional Investors Statistics, Indicators of Industry and Services, Structural Statistics for Industry and Services, International Trade and Competitiveness Indicators, DAC Aid Performance, External Debt Statistics, Agricultural Commodities Outlook, et al.

Gather Data Easily

DSI's Statistical Compendium Series offers DVD and internet solutions to provide intelligent access to millions of time series:

- simultaneous search across all sources by single or combined keyword search, supported by an online library to avoid misspellings or unpromising requests;
- hierarchical breakdown for an easy step by step data access by choosing the source, the subject, the country, the indicator...
- by treeview, the state of the art data extraction at database level by defining the requested data in detail first, e.g. the specific country, subject, indicator and/or unit.

Analyze Data Quickly

Working with data is simple using the implemented statistical analysis tools, available on the level of data tables by default:

- immediate data export into an universal format for external analysis
- statistical standard evaluations as mean, standard deviation, moving average, growth rate, lags
- forecasts by trend prognoses
- implemented calculation utilities for time series operations

Present Data Effectively

DSI's data navigator for DSI's Statistical Compendium Series has a powerful graphics engine to create dynamic charts (for instance: line plots, pies, columns, pyramids or nets).

It allows art works and editing, and final charts could be loaded easily for direct implementation into reports or electronic publications.

Usage Statistics (ip controlled internet)

Usage statistics will be generated on a monthly basis and could be monitored online or send by e-mail on request.
