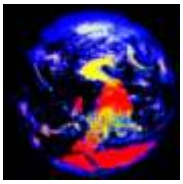
DSI's Global Environmental Database 2011



DSI’s Global Environmental Database 2011

DSI’s Globlal Environmental Databaase edition 2011 has been updated and presents 300+ up-to-date statistical time series indicators across up to 280 countries and regions worldwide.

DSI's Global Environmental Database brings together hard to find statistics on the environmental issues affecting our climate, our resources, our social communities:

- detailed data on energy consumption and emmissions from fuel combustion,
- water resources, land use, agriculture, farming, forestry and fishery,
- human resources (population, education, skills),
- social conditions (health, sanitation, poverty, natural disasters),
- economic core indicators (GDP, production, trade, exchange rates).

DSI's Global Environmental Database is an indispensible source to

- identify trends across different countries,
- compare one country's environmental situation and policies with another,
- find out which countries are making efforts to protect their environment.

CD-ROM archive available: DSI's Global Environmental Database (GED) on CD-ROM comes along with a powerful retrieval engine and includes online access to the corresponding GED internet services without surcharge.

DSI's Global Environmental Database 2011

Data Coverage

DSI's Global Environmental Database allows to enhance a broad national, regional and global environmental analysis.

I. Elementary Resources
- atmosphere: air quality, climate
- water: quality/ pollution, reserves
- terrestrial/ soil: land use, fertilization, salinization

II. Natural Resources
- food
- agriculture
- farming
- fishery
- forestry
- biodiversity

III. Mineral Resources
- coal
- oil
- natural gas
- uranium

IV. Energy Consumption
- total
- by sector
  - coal
  - natural gas
  - oil
  - charcoal
  - biomass, wood, waste

V. Human Resources
- population
- education
- skills

VI. Social Conditions
- health
- sanitation
- poverty
- disasters (natural)

VII. Waste
- hazardous
- ex-/ import

VIII. Economic Core Indicators
- GDP
- production
- trade
- exchange rates
