INTERNATIONAL  
STATISTICAL  
YEARBOOK  
2 0 1 1

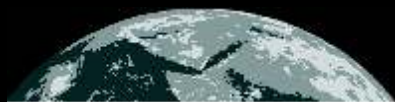

internet licence or combined: internet + archival DVD

22nd edition

# INTERNATIONAL STATISTICAL YEARBOOK

## Key benefits

### sources:

- UNIDO, IMF, World Bank, OECD, Eurostat, national institutions

### services:

- combined product (DVD+Internet)
- Internet only

(all internet services are offered for user id/ passcode or ip controlled login)

### features:

- unique source of harmonized data
- data history up to latest figures
- monthly updates (Internet only)
- powerful retrieval engines
  - by keyword search
  - by hierarchical breakdown
  - search by tree view
- embedded statistical tools
  - calculations
  - statistical operations
  - forecasts
  - regressions (DVD only)
- reports
- graphing applications
- data download

### licences:

- could be run in a local area or campus network without surcharges

### highly recommended for:

- political consulting, strategic planning, empirical studies

# I n t e r n a t i o n a l S t a t i s t i c a l Y e a r b o o k 2 0 1 1

22nd edition of DSI's premier collection

The International Statistical Yearbook 2011 (ISY) is a unique compilation of the most important economic time series databases and key aggregates from various national and international sources:

World Statistics: for more than 200 Countries in the World  
Sources: United Nations, IMF & World Bank, OECD & Eurostat, European Central Bank

- World Development Indicators
- Global Development Finance
- Global Economic Statistics
- General Statistics
- Financial Statistics
- Industry & Industry Balance Statistics

OECD Member States Statistics

Source: OECD, Paris

- Main Economic Indicators incl. Leading Indicators

European Union Member States Statistics

Source: Eurostat, Statistical Office of the EU

- Short-term indicators
- Structural indicators
- Sustainable Development
- General and regional statistics
- Economy and finance
- Population and social conditions
- Industry, trade and services
- Agriculture, forestry and fisheries
- External Trade
- Transport
- Environment and energy
- Science and technology
- Regional Statistics

United States of America & Germany Statistics

Sources: national FEDs and Statistical Offices

- Summary tables
- National accounts
- Prices and interest rates
- Industrial production
- Labour market indicators
- External economic relations
- Short term economic indicators

Users and researchers find the complete data history as far as stored by the institutions shown, classified and calculated on the basis of common nomenclatures and concepts. All time series are maintained and updated in accordance with standardized guidelines - directly with the source. This guarantees a high degree of comparability, making ISY an indispensable tool for any serious economic analysis.

# I n t e r n a t i o n a l S t a t i s t i c a l Y e a r b o o k 2 0 1 1

## World Development Indicators (World Bank)

The premier data source on the global economy. It contains statistical data for over 800 development indicators and time series data from 1960 for over 200 countries and 18 country groups. Data include social, economic, financial, natural resources, and environmental indicators.

## Global Development Finance (World Bank)

The publication will allow government officials, economists, investors, financial consultants, academics, bankers, and the entire development community to better understand, manage, and promote the key challenges of financing development.

## Global Economic Statistics (DSI)

Macroeconomic core statistics, simultaneously expressed in current and constant prices, change against previous period, differences in change, difference against previous period, ratio per capita of population, part of Gross Domestic Product, index: national accounts, industrial production, imports/ exports of goods and services, prices, labour, population, monetary aggregates, interest rates, government finance.

## Financial Statistics (IMF)

The standard source of international statistics on all aspects of international and domestic finance. It reports, for most countries of the world, current data needed in the analysis of problems of international payments and of inflation and deflation, i.e., data on exchange rates, international liquidity, international banking, money and banking, interest rates, prices, production, international transactions, government accounts, and national accounts.

## Industry & Industry Balance Statistics (UNIDO)

These series offer statistical information to e.g. national governments, international development partners, academic research institutions and the business community. Primary importance is given to the quality assurance of statistics, especially in terms of international comparability of data with respect to recommended concepts and definitions, classification and coverage (3- and 4 digit level of ISIC, Rev. 2 + 3, USD + nat. curr.).

Main Economic Indicators, incl. Leading Indicators (OECD)  
OECD's "master piece" makes available monthly, quarterly and annual time series covering the main aggregates of national accounts, industrial production, business surveys, deliveries, stocks and orders, construction, domestic trade, labour, wages, prices, domestic and foreign finance, interest rates, foreign trade and balance of payments.

## European Union's database (Eurostat)

This unique collection of the European Union's member states' macroeconomic and social statistics has been created for the political decision making and therefore harmonized for easy comparability. It presents the economic situation of all 27 EU Member States, as well as, in many cases, those of the US, Japan, Central European countries and main economic partners.

## Gather Data Easily

DSI's International Statistical Yearbook provides intelligent access to millions of time series:

- simultaneous search across all sources by single or combined keyword search, supported by an online library to avoid misspellings or unpromising requests;
- hierarchical breakdown for an easy step by step data access by choosing the source, the subject, the country, the indicator..
- by treeview, the state of the art data extraction at database level by defining the requested data in detail first, e.g. the specific country, subject, indicator and/ or unit.

## Analyze Data Quickly

Working with International Statistical Yearbook's data is simple using the implemented statistical analysis tools, available on the level of data tables by default:

- immediate data export into an universal format for external analysis
- statistical standard evaluations as mean, standard deviation, moving average, growth rate, lags
- forecasts by trend prognoses
- implemented calculation utilities for time series operations

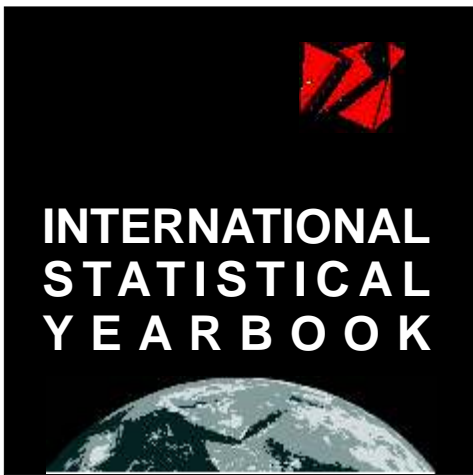

## Present Data Effectively

DSI's data navigator for DSI's International Statistical Yearbook has a powerful graphics engine to create dynamic charts (for instance: line plots, pies, columns, pyramids or nets).

It allows art works and editing, and final charts could be loaded easily for direct implementation into reports or electronic publications.

## Usage Statistics (ip controlled internet)

Usage statistics will be generated on a monthly basis and could be monitored online or sent by e-mail upon request.
